

Top Reasons to Get Sibelius for Education

The fastest, smartest, easiest way to write music

The world's best-selling music notation software, Avid® Sibelius® combines the sophistication demanded by top composers, arrangers, and publishers with a simplicity that's ideal for students. If you're a student learning to write music or an educator who wants your students to succeed, here are eight reasons why you'll want the new Sibelius.

Starting at
\$8.25/month

1. Access Sibelius in more ways than ever

You now have more choice in how you acquire and use Sibelius. Purchase and own the software with a Sibelius for Education perpetual license. Access Sibelius only when you need it through a low-cost monthly or annual subscription. Or get started with Sibelius | First, an entry-level, more affordable version of Sibelius. And with the new Avid upgrade plan included, you now get access to more frequent Sibelius upgrades throughout the year for no additional charge.

2. Compose faster

Sibelius features task-focused tabs that lead you through the process of creating a score from start to finish. Unique features such as Magnetic Layout and Dynamic Parts simplify and speed up the process of adjusting layouts and creating parts, saving countless hours. Plus, the new Timecode window makes navigating large scores a snap.

3. Get professional-quality sound

Hear every nuance of your composition with the included 36 GB Sibelius Sounds library, featuring a specially recorded symphony orchestra, rock and pop instruments, and more. And hear your score the way you intended it to be heard with Espressivo 2.0 providing total control over the rhythmic feel.

4. Collaborate and share your scores

Easily collaborate with others by sharing Sibelius files over email or through MusicXML. Record audio from Sibelius to Pro Tools® and other DAWs for further collaboration using ReWire. And share your scores with the world on ScoreExchange.com, YouTube, Facebook, and SoundCloud.

5. Experience 64-bit performance

Sibelius is the ideal choice for musicians looking to unleash the full potential of their 64-bit operating systems. With full VST and Audio Unit compatibility, you can load much larger and more realistic sound libraries.

6. Start teaching now

The Worksheet Creator frees up hours of time with its comprehensive range of ready-made teaching materials—over 1,700 worksheets, projects, exercises, songs, instrumental pieces, lyrics, posters, reference materials, and other resources are included. Instructors can customize them or create their own worksheets using the included blank templates.

7. Control your classroom

A single, simple Classroom Control window shows you every running copy of Sibelius, as well as each student's user name. Freeze students' programs to keep their attention. Get a copy of the score each student is working on—or send a score to any student, or to all of them at once. Prompt students to save a version of their scores with the Versions feature to track their progress. And it's all password protected for complete security.

8. Get special academic pricing

Avid offers special pricing for academic institutions, teachers, and students, starting at just \$8.25 a month for a subscription, or own Sibelius for \$299. You get all of the same tools the pros use to jumpstart careers at a fraction of the price.
