

Media Composer

The professional's choice for creative editorial

Media Composer® is the media and entertainment industry's most used video editing software, accelerating high-res, HDR, and HD workflows. With tons of great new features, starting now at just \$19.99/month, experience the thrill of inspired storytelling with tools that empower you to create the best story possible.

GET THE TOOLS YOU NEED

Got a story to tell? There's a Media Composer for everyone. Get started for free with Media Composer | First. Access the full suite of industry-standard editing tools with the new low-cost Media Composer, starting at only \$19.99/month. Or gain real-time collaboration, MediaCentral® integration, Avid NEXIS® support, and additional dialog search, finishing, and newsroom tools with Media Composer | Ultimate*.

TELL GREAT STORIES

Accelerate storytelling with the tools embraced by top movie, television, and broadcast editors. From first cut to final finishing, Media Composer helps spark and speed your creativity like no other, enabling you to take on any media resolution, work with HDR and 3D content, and create impactful scenes, effects, and soundtracks with unmatched ease.

EDIT HD AND HIGH-RES VIDEO NATIVELY

From the biggest movies to small indie films, more productions today are shooting in 4K and beyond. With Media Composer, you can edit and deliver high volumes of high-res media quickly. And get native support for the widest array of media codecs, including those from Panasonic, Sony, RED, Canon, and more.

WORK FASTER, NOT HARDER

Media Composer takes care of the time-consuming tasks for you, so you can focus purely on telling your story. From automating complex tasks and rendering effects in the background, to simplifying high-res workflows and managing media, you get timesaving tools that work the way you want—without getting in the way of your creativity.

GET THE AVID HARDWARE ADVANTAGE

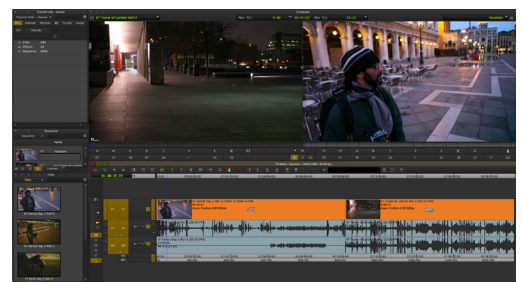

Looking for the fastest way to capture, monitor, and output high-quality video? Pair Media Composer with an Avid® Artist interface and get the tight integration you need to handle the most demanding workflows—from portable 4K interfaces, to solutions that offer an extensive array of I/O or video over IP. You can also use third-party interfaces through Avid Open I/O.

* Please note that the original version of Media Composer with all the real-time collaboration tools and integrated MediaCentral workflows has been renamed Media Composer | Ultimate and now comes with a bundle of additional software. The new lower cost version of Media Composer is ideal for professional, independent editors and movie makers, while Media Composer | Ultimate is a must for editorial teams and those working in a collaborative MediaCentral environment.

“These tools have become so powerful... I don't have to think about how I hammer the nail—I can just be creative.”

Alan Edward Bell, ACE

Editor (*The Hunger Games: Mockingjay*,
The Amazing Spider-Man, *Water for Elephants*)
